

# Part II CRL Administrator's Guide

## Chapter 10: *CRL Installation*

This chapter describes how to install **CRL**. **CRL** is available both for Linux and for Windows.

## Chapter 11: *Configuring and Launching CRL*

This chapter describes the configuration tasks that are necessary for running the application, for customizing the desktop environment to your experiment, and for enabling particular features of **CRL**. It also discusses invoking the application.

## Chapter 12: *Configuring CRL to Use a Remote File System*

In this chapter, we describe to the **CRL** administrator how to configure the remote file system capability.

## Chapter 13: *Managing User Information*

This chapter describes how to add, activate and deactivate users, as well as how to change information about them.

## Chapter 14: *Configuring Web Access to Logged CRL Entries*

This chapter lists tasks that are necessary for creating a web site for your **CRL** entries, in order that collaboration members anywhere in the world can search, view, and annotate your experiment's logbook entries.
