COLLOQUIUM

Some hopefully harmonious topics from harmonic analysis: Singular Integrals Both Classical and Modern

Robert Fefferman

University of Chicago

May 20, 2015

4:00 p.m. (coffee @ 3:30)

This will be a rather self-contained talk examine the topic of singular integrals and explaining their centrality within mathematical analysis. We shall describe methods analyzing the behavior of these operators and discuss both the classical theory as well as some of the more modern developments.
