

Neutrinos in a New Light

Ellen Sandor

Art^n @Fermilab

December 7, 2016

4:00 p.m. - Wilson Hall, One West

Neutrinos in a New Light is an exhibition of PHSCologram sculptures, Oculus Rift Virtual Reality, projection mapping and 3D printing, all depicting Ellen Sandor and (art)n's work with Fermilab as their 2016 Artist in Residency. The exhibition artistically examines Fermilab scientists' research including NoVa, MINOS, and MINNERvA neutrino detectors as well as their new MicroBooNE argon chamber detector. The final works are on display at Fermilab from December 2, 2016 through March 17, 2017.
