

Summary of proposal

Carlo Ferrari

December 16, 2016

The research program will focus on the laser calibration system for the Muon g-2 experiment and will be dedicated to the following items:

- 1) Installation of the laser system in the laser hut.
- 2) Installation of the laser distribution system in the ring.
- 3) Commissioning of the laser calibration system.
- 4) Design, realization and test of the calibration system for the IBMS detectors.
