

Greetings from Friends

I wish you a fantastic top celebration event. And if you want to see me often in the future at Fermilab: start building the ILC at your location. The sooner the better from my point of view; in the USA. Will give you the definite say about the Higgs and who knows what else. And will attract many Europeans (and Asians) once again to the USA

Best regards,

Frank Linde
Director
NIKHEF

Congratulations on Top's tenth birthday. I have always thought of Fermilab as the home of the Standard Model's third family: both top and bottom were discovered there, and the tau neutrino was observed directly for the first time in the DONUT experiment. I am sure that the more we learn about the third family and its relations at Fermilab, the greater our chances of making major discoveries at LHC.

It goes without saying that I shall be absolutely delighted should one of those discoveries be made at Fermilab before LHC gets going full blast.

Best Wishes,
Peter
S. Peter Rosen
Senior Manager for Research Policy
U.S. Department of Energy
Office of Science

I send my best regards to all my friends at Fermilab as they celebrate and recall this great achievement of so many.

It represents monumental discovery in the history of science which Fermilab, and the collaborations, can take great pride in. Please pass my highest respect and renewed congratulations to the collaborations.

Sincerely,
Jim Brau

Thanks very much for your invitation. I will not be able to attend the symposium on October 21 but I am very happy to collaborate with Fermilab through a team involved in DØ.

Best regards.

Pr ALAIN BALDIT
Directeur du LPC

I was honoured by the kind invitation to the symposium "Top Turns Ten" at Fermilab on October 21, 2005. Unfortunately my schedule does not allow me to accept this invitation which I regret as I am sure that the symposium will be very interesting. I would also like express my wishes of the success in your future work.

Yours sincerely,

Professor Ivan Wilhelm
Rector of the Charles University

Dear Dr Oddone,

Thank you for your letter of 26 September inviting me to participate in the event "Top Turns Ten".

The symposium celebrating the achievements related to the discovery at Fermilab of the top quark is certainly an event I would have liked to attend.

I am also sorry not to be present at the reception which could also have been an opportunity to further develop contacts with the Fermilab community.

...

Best wishes for you and the Fermilab colleagues for this special day

Best regards
Robert Aymar
Director-General
CERN

My congratulation to the 10th anniversary of the great discovery,

Tune Kamae
Stanford Linear Accelerator Center
Former Fermilab Physics Advisory Committee Member

As the director of a lab which is involved in DØ, I wish Fermilab members a very happy celebration and all my best for their physics results throughout the end of this decade .

With my best regards ... Johann Collot
Directeur du LPSC de Grenoble

Thank you for you very kind invitation of September 27 to participate to the "Top Turns Ten". I wish to all participants a very active and fruitful symposium.

With my best regards,
Bernard Meunier
President, CNRS · France
