

Physics for Everyone

A non-technical lecture series about Fermilab science and culture

Focusing on our Future
12:30 – 1:30 p.m.

October 25, 2012

Ramsey Auditorium

Don Lincoln *USCMS Education and Outreach Coordinator*

Relativity at the Energy Frontier: *accelerators such as the Tevatron and LHC are among the only places on Earth in which Einstein's special theory of relativity applies.*

November 14, 2012

Ramsey Auditorium

Dave Harding *Deputy Head, Technical Division*

Magnets at Fermilab: *accelerators and experiments depend on magnets of ever-increasing sophistication to control and measure elementary elements.*

December 12, 2012

Ramsey Auditorium

Bob Kephart *IARC Project Manager/ILC Program Director*

Illinois Accelerator Research Center (IARC): *a new facility currently under construction at Fermilab that will focus on private industry and its use of a particle accelerator technology.*
