## Ray Yarema Steps Down as Auditorium Committee Chairman

Former Auditorium Committee Chairman Ray Yarema stands on the catwalk he helped to build. (Click on image for larger version.)

Ray Yarema, head of the Electronics Department in the PPD, steps down from his position as Chairman of the Auditorium today after four productive years. As chairman, Yarema has managed major improvements to Ramsey Auditorium, such as installation of new lighting and sound systems, construction of a state-of-the-art catwalk, and replacement of a dangerous 15-foot stage ladder with a permanent staircase.

"I've never seen anybody who can get things done like he can," said Janet MacKay-Galbraith, coordinator for the Arts and Lecture Series. "He's so good that we roped him into a second term." Yarema also initiated patron surveys to learn how to improve theater services, which led the committee to sell half-priced tickets to youths, create a permanent box office, and start the Gallery Chamber series--three classical performances held in the Art Gallery on Sunday afternoons during the winter.

## Artist Reception Tonight

"Different Views" by Sue Skowronski. (Click on image for larger version.)

"Perspectives of the Midwestern Landscape," a collection of rural paintings by local artists Sue Skowronski and H. Dean Willis, will show in the Wilson Hall Art Gallery until August 30. "I wanted to put together an exhibit that people would remember," said Georgia Schwender, the Gallery Curator. "Put together, Skowronski's vibrant cow portraits and Willis' quiet watercolors of farm scenes perfectly represent the old Midwest. Their art is a way for them to preserve the Illinois farmlands that are quickly disappearing."

Skowronski and Willis will be present at an artist reception from 5:00 to 7:00 p.m. tonight to discuss their work over wine and hors d'oeuvres. Members of the public are invited to come, but need to contact Schwender to gain access to the site (630-840-6825, or [georgia@fnal.gov](mailto:georgia@fnal.gov)).

"I also want to remind Fermilab artists to start preparing their submissions to the 2005 Employee Art Show," Schwender said. "It's a long way off, but the more pieces of art the better."

"Despite a recent industry-wide drop in attendance to classical concerts, the Chamber series has consistently been able to attract full houses," MacKay-Galbraith said. Sound buffers and curtains had to be added to improve the gallery's acoustics and block the afternoon sun, but the concerts have proved to be very cost effective. "They're a financially responsible way of satisfying our audience," said Yarema. "And they give local musicians a chance to perform in an intimate setting."

Hank Glass, Deputy Head of the Development and Test Department, will become the new committee chairman. Yarema will remain a committee member.

"I ask Ray where he gets all the time and energy to do what he does, and he just shrugs," Glass said. "He's extremely organized and has lots of good ideas-- everything you could want in a chairman. He'll be a tough act to follow."

#### A Quiet Revolt Puts Costly Journals on Web

by Pamela Burdman

When Dr. Miguel Nicolelis, a neurobiologist at Duke University, decided to release a groundbreaking study in an upstart online journal, his colleagues were flabbergasted. The research, demonstrating how brain implants enabled monkeys to operate a robotic arm, was a shoo-in for acceptance in premier journals like Nature or Science.

"Usually you want to publish your best

"Bacchus" by H. Dean Willis. (Click on image for larger version.)

## Announcements

### New Book Purchase Suggestions

New Book purchase suggestion lists for the week of June 29 are now [available](#). These include Majors book lists in four subject areas. There is also an Amazon suggestion list in the form of a shopping cart, viewable by entering the password "library."

### Unix Users Meeting Today

The agenda for today's Unix Users Meeting at 1:00 p.m. in Curia II is:

- \* Announce winner of the new Logo contest.
- \* The new windows terminal server - how to use it from Linux
- \* Fermi Linux Logo Design Winner Announced
- \* Scientific Linux 3.0.2
- \* Fermi Linux LTS 3.0.2
- \* Tips and Tricks
- \* Quiz
- \* Questions and Answers

### Muscle Toning Class

The next Muscle Toning Class will be held from July 6 through July 29. This 4 week class is \$32.00. Classes are held on Tuesday and Thursday in the Recreation Facility exercise room. Registration deadline is Friday, July 2. You must be a current facility member to participate. Registration can be made in the

work in well-established journals to have the widest possible penetration," Dr. Nicoletis said. "My idea was the opposite. We need to open up the dissemination of scientific results." The journal Dr. Nicoletis chose — PLoS Biology, a publication of the Public Library of Science — aims to do just that by putting peer-reviewed scientific papers online free, at the Web site [www.plosbiology.org](http://www.plosbiology.org).

The high subscription cost of prestigious peer-reviewed journals has been a running sore point with scholars, whose tenure and prominence depend on publishing in them. But since the Public Library of Science, which was started by a group of prominent scientists, began publishing last year, this new model has been gaining attention and currency within academia.
