

Scheduling Meeting of August 4, 2009

Days Worked since last Recordable Injury = 6

Includes Employees & subcontractors

	FY06	FY07	FY08	FY09	Goal
TRC Cases	29	31	12	19	<12
DART Cases	7	12	3	11	<5

Injuries/Vehicle Accidents Reported

07/27/2009 – 08/03/2009

Division	Category	Case Date	Date Entered	Recordable?	Rx	Medical		ESH	
						ODD	LDD	ODD	LDD
FE	FNAL	07/27/2009	07/28/2009	Yes		5	0	5	0

Medical Comments: Employee felt twinge in lower back while moving (pushing, pulling) a generator into a garage with 3 co-workers. Strain also affected left thigh, left shoulder and upper arm.

ESH Comments: Individual was one of four electricians asked to push a generator back into the storage building in order to make room for a truck to be parked in the garage at the end of the shift. The generator is on a double axel trailer and the tongue is supported by a post (no wheel). The tongue weight was in excess of 400lbs. The supervisor who assigned the work assumed the generator has a wheel on the support post (similar to the smaller generator located at the same location) and that 4 individuals could safely push the unit back into the storage building. The shop has a 'tugger' typically used for this type of job but it was out of service. The 4 electricians proceeded to lift/push/pull the generator into its storage location and during this course of this activity the individual felt a small 'twinge' in his back but no pain. The individuals back stiffened up overnight and he reported to the medical department upon arriving to work. He was giving restrictions for the remainder of the day and was re-evaluated on 7/29/2009 where he was sent home unable to work. This case is a DART.
