

Scheduling Meeting of December 8th, 2009

Number of TRC and DART cases by FY - Includes Employees & subcontractors

	FY06	FY07	FY08	FY09	FY10	Goal
TRC Cases	29	31	12	26	1	<12
DART Cases	7	12	3	12	0	<5

Injuries/Vehicle Accidents Reported

11/30/2009 - 12/07/2009

Division	Category	Case Date	Date Entered	Recordable?	Rx	Medical		ESH	
						ODD	LDD	ODD	LDD
AD	SV	12/02/2009	12/02/2009	No	Y	0	0	0	5

Medical Comments: While pushing a spool of wire, subcontractor's right foot/heel dropped into a groove (along a track), causing a pulled calf muscle. Treated at an off-site clinic, where a prescription was given for an anti-inflammatory medication.

ESH Comments: The contract technician was working with lab employees to move 3 ft diameter reels of heliax cable into the north end of PC4 for storage. PC4 has a pair of rails embedded in the floor running the length of the enclosure, with a groove along one side of each of the rails. While rolling one of the reels, the contract technician stepped on one of the grooves and the heel of his right boot became wedged in the groove. Because the boot was caught in the groove, when he attempted to take the next step his right calf muscle was strained since his right foot could not raise up. *Although prescription medication and limitations were given, this case does not meet the criteria for recordability since the individual's contracting company has less than 10 personnel working on site.*

TAKE 5 CHALLENGE:

We are asking employees to "**Tell Us About Your Take 5 Moment**". Share a time when taking five minutes to think about what you were doing was a good decision.

Use this Web form:

<http://www.fnal.gov/pub/takefive/challenge-form.html>

On Dec. 16, at the laboratory-wide potluck party, we will randomly choose five entrants and award each of them a Fermilab fleece sweatshirt

ORPS/Incidents/Notices of Violation:

None Reported

H1N1 Update:

- 158 suspected cases have been reported thus far (6 in the last week again).
- PLEASE REMEMBER TO REPORT YOUR FLU LIKE SYMPTOMS TO THE MEDICAL OFFICE. THIS IS THE ONLY MECHANISM THE LABORATORY HAS TO TRACK SUSPECTED H1N1 CASES AND IDENTIFY POSSIBLE CLUSTERS.
- Questions or concerns should be directed to Dr. Brian Svazas at X3232 or svazas@fnal.gov.
