<b>Medical Comments:</b> Colleagues dropped a screwdriver from above, hitting employee (below) on head, and causing a contusion.									
<b>ESH Comments:</b> While working in the D0 detector hall on electronics, the individual took off the hard hat to do work. Workers above kicked a screwdriver through a space in-between two platforms. The screwdriver struck the individual in the head causing a small laceration. First aid only. Hard hats are required in area and when work is ongoing overhead according to the D0 Hazard Awareness Training. The individual completed the training one year ago and was valid.

<b>Medical Comments:</b> Employee was brazing a piece of copper; placed it on the floor, then squatted to unclamp the copper. Felt discomfort in left knee, and stood up to relieve it. When the squatting was tried again, the discomfort returned.									
<b>ESH Comments:</b>									

**ORPS/Incidents/Notices of Violation:**

None Reported

**H1N1 Update:**

- Please consider getting your H1N1 flu vaccination. They are readily available at most pharmacies and through some doctor's offices and health departments. Last year, we saw a spike in H1N1 in the April/May time frame. It is possible that we will see that again this year.
- 169 suspected cases have been reported thus far.
- Questions or concerns should be directed to Dr. Brian Svazas at X3232 or [svazas@fnal.gov](mailto:svazas@fnal.gov).
