Medical Comments: Employee exited the lock shop and headed towards carpenter shop. He pivoted on right foot to turn and did not note ice on the ground. Lost balance fell on right side with right arm out and behind to stop fall. Instant pain and restricted right shoulder movement. Seen at Rush Copley ER where X-rays were done. Given prescription meds.

ESH Comments: The employee slipped on ice that had formed in a small depression near Lock shop entry door and the travel path from Lock shop to Carpenter Shop. The Lock shop roof has a south exposure and snow melt occurred and ice formed in the depression later in the day. A prescription medication was issued at the emergency room and the employee returned to work with no restrictions that impact his routine functions. However, the MRI results showed a tear in one of tendons that make up the rotator cuff and surgery will be required as well as some period of immobilization and rehabilitation.
