**Medical Comments:** The employee pinched the 4th finger of left hand between the snowplow and loader. The hydraulic hose was in between the gap that is used to tell if plow/snow pusher is level. The employee removed the plow/snow pusher to install load bucket. The hydraulic hoses had pressure on them so he went on to another job to let lines bleed. When he came back and was pulling the hoses to hook them back up, the plow settled on the hose and his finger. Medical treatment was given.

**ESH Comments:** None Entered
