

## Scheduling Meeting of July 10<sup>th</sup>, 2012

Number and rate of TRC and DART cases by FY - Includes Employees & Subcontractors

	FY08	Rate	FY09	Rate	FY10	Rate	FY11	Rate	FY12	Rate	Goal	Rate
<b>TRC Cases</b>	12	0.66	26	1.22	19	1.04	20	1.03	25	1.72	<12	0.65
<b>DART Cases</b>	3	0.16	12	0.64	6	0.34	6	0.26	9	0.76	<5	0.25

**TRC** = Total Recordable Case means more than first aid treatment was given.

**DART** = Days Away Restricted Transferred means more than first aid treatment was given AND restrictions were job limiting or the employee could not work.

### Injuries:

Division	Category	Case Date	Date Entered	Recordable?	Rx	Medical		ESH	
						ODD	LDD	ODD	LDD
AD	SV	06/29/2012	07/02/2012	No		0	0	0	0

**Medical Comments:** The subcontract employee removed two ticks that were embedded in his skin.

**ES&H Comments:** The subcontract technician was working with co-workers doing prep work associated with the rehabilitation of the G2 beam pipe. While working outside the G2 Service Building, the individual found several ticks on his clothes and skin, including 2 that had become embedded. The individual removed the ticks and reported to the Medical Office for evaluation. He received first aid treatment and returned to work with no limitations. At the time of the incident the individual and his co-workers were using an insect repellent containing a moderate amount of DEET. Since that product proved ineffective, a new insect repellent containing a higher concentration of DEET was obtained for their use.

<b>Medical Comments:</b> The employee was stretching while the golf cart he was riding on was in motion. He struck his arm on a fixed object causing a laceration. No sutures were required.									
<b>ES&amp;H Comments:</b> The T&M subcontractor was riding as a passenger on the back of a golf cart (facing opposite the direction of travel) in the 640 region of the Main Injector tunnel. As the cart was traveling down the tunnel, the individual stretched out his arms to the side (as a means of muscle relaxation) and his right wrist struck a square aluminum bar (2"x2"x4', part of the Enclosure Tilt Monitor system) attached to the enclosure wall, resulting in a laceration. There are multiple bars of this type mounted horizontally to the enclosure wall 3.5' above the floor in this region of the MI tunnel. The individual reported to the Medical Office where he received first aid treatment for the laceration and returned to work with no limitations.									
PD	FNAL	07/03/2012	07/03/2012	No		0	0	0	0
<b>Medical Comments:</b> While unloading a truck at railhead, the employee was stung on right, upper arm by a wasp.									
<b>ES&amp;H Comments:</b> First aid treatment only.									
PD	FNAL	07/06/2012	07/06/2012	No		0	0	0	0
<b>Medical Comments:</b> While pulling on a lifting strap, the strap came loose and the employee was struck in the left, lower lip by the shackle.									
<b>ES&amp;H Comments:</b> First aid treatment only.									

**Vehicle Accidents:**

None

**ORPS/Incidents/Notices of Violations:**

There was an incident in AD where a contractor employee had been working in the Main Injector enclosure for a period of 8 weeks without wearing a personnel dosimetry badge. He had been wearing a pocket dosimeter and was tabulating his dose. AD is currently investigating to determine the errors and organizational weaknesses that led to this unwanted outcome.
