**Medical Comments:** While removing a computer cable from a server in a rack, employee cut second finger on a tiny metal tab that was bent outward.

**ES&H Comments:** Employee was removing an Ethernet cable from a server in the LCC Computer Room. A small, flexible metal tab, which is part of Ethernet socket to help hold the cable in place, was protruding out (usually flush with the surface). This was also slightly above eye line, but since the cable was still in, it wouldn't be visible, anyway. The employee's finger ran over this metal tab and cut his right, index finger.

Claim Pending cases will now appear on the Scheduling Meeting Handout with the understanding that they are still under investigation and the details of the case may change.

----	------	------------	------------	----	---	---	---	---

**Medical Comments:** Confirming audiogram shows STS left ear. Repetitive trauma due to shears, presses, arc cutting, oxyacetylene torch cutting. States always wore PPE (ear plugs and ear plug muffs at same time.)

**ES&H Comments:** STS is under investigation jointly by Fermilab Medical and TD SSO.
