**Medical Comments:** Employee was walking from the transfer gallery to Wilson Hall and was going up an incline when she slipped and twisted. She did not fall. As the day progressed she had soreness and stiffness. On 3/6/14, symptoms worsened and she will be going to her PCP. Will return to work thru FMO.

**ESH Comments:** At 2:30 on 3/5/14, the employee was walking from Wilson Hall in the east parking lot back to her Transfer Gallery office. As she was walking south in the parking lot she stayed to the right because she saw a vehicle approaching. Her right foot stepped on the decline in the pavement at the Wilson Hall loading dock area, which was slippery from the recent snowfall. Her body twisted sharply, but she did not fall. She proceeded back to her office and worked the remainder of the day. She developed significant soreness and stiffness after going home. The employee went to her personal physician on the following day, 03/06/14, and was advised to remain off work until 3/7/14. She returned to work on 3/7/14 and reported to the Medical Office and was diagnosed with lower lumbar strain. She has returned to work with restrictions that do not prevent her from performing all of her routine job functions.
