**Medical Comments:** Employee was re-installing toilets after repairing clogged sewer line and he picked up the toilet to place on drain when he felt pain and spasm in lower back. Did not feel well enough to work on 2/10/15 - stayed home. Informed his supervisor of incident on 2/11/15 and reported to medical. Rx given for muscle relaxant and anti-inflammatory. Employee going for physical therapy.

**ESH Comments:** On 2/9/15, the individual experienced back spasms / pain while pulling and setting a pressure assisted Gerber ADA-compliant toilet. The pain increased over night and the individual was unable to report to work on 2/10/15. On 2/11/15, the individual reported to the Fermilab Medical Department for evaluation. Restrictions and Rx were given to the individual. The restrictions were unable to be accommodated and the individual was sent home. This case is a DART. A review of the incident indicated a need to revise procedures for pulling and setting pressure Assisted Gerber ADA Toilets and all others that exceed our 50 lb. weight limit restriction. It was determined that the Gerber Tanks weigh 47 lb. empty and the Bowls are 43lbs. empty for a combined 90 lbs. Add a gallon or more of water remaining in the pressure bladder and the trap and this easily exceeds 100 lbs. Weights for all toilets will be determined. Revisions to HA's and Work Procedures will indicate the need to separate the tank from the bowl before removing these toilets. For older style non-ADA or pressure assisted toilets, the procedure will be evaluated on a case by case basis dependent on the weight of the unit.

### **Claims Pending:**

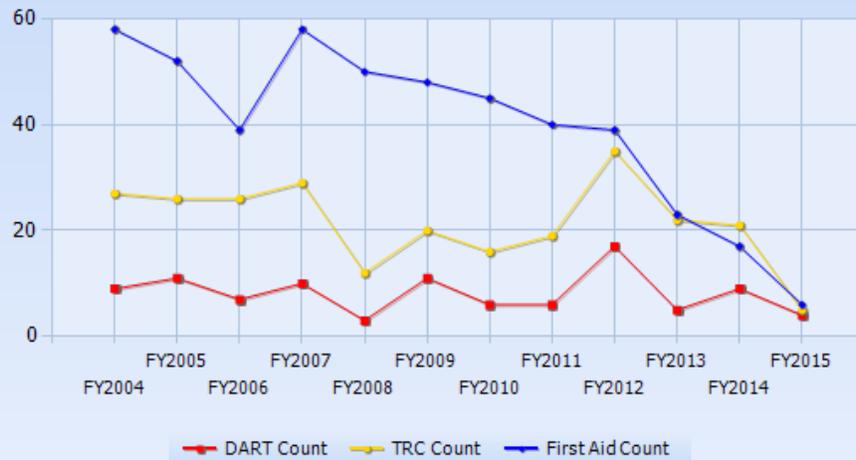

### **Vehicle Accidents:**

None

### **ORPS/Incidents/Notices of Violations:**

None
