SCD	FNAL	03/02/2015	03/02/2015	N		0	0	0	0

**Medical Comments:** Employee picked up a SATA controller and experienced pain. A fiber-optic port had a sharp edge on it cutting the employee's right hand near palm. Area cleaned and bandaged.

**ESH Comments:** Employee was picking up controller equipment from a colleague's office. As he grabbed it, he put his hand around a portion of the equipment that protruded out.

Division	Category	Case Date	Date Entered	Recordable	Rx	Medical		ESH	
						ODD	LDD	ODD	LDD
AD	FNAL	03/03/2015	03/03/2015	N		0	5	0	0

**Medical Comments:** As exiting the lab truck the employee slipped on ice. His right foot slipped out catching himself with his left leg, wrenching his knee and hip. He then stumbled 3 steps and wrenched his back. He did not fall to the ground. Snow was cleared but icy.

**ESH Comments:** The employee was walking from the MI-60 Service Building parking lot toward the entrance door to the MI-60 high bay when the incident occurred. There had been a snowfall earlier and freezing rain was occurring at the time. The snow had been shoveled in that area, but the subsequent freezing rain had left a coating of ice that the employee did not see. As the employee stepped from the asphalt area onto the concrete sidewalk, his right foot slipped out from under him as he stepped on the ice and he lost his balance. He stumbled forward; though he did not fall to the pavement, he did wrench his back and left hip and knee in his attempt to prevent himself from falling. He reported to the Medical Office, where he received first aid treatment and was released to work with limitations which did not prevent him from performing his routine functions, so case is not a DART. Salt was applied to the area following the incident.

**Claims Pending:**

None

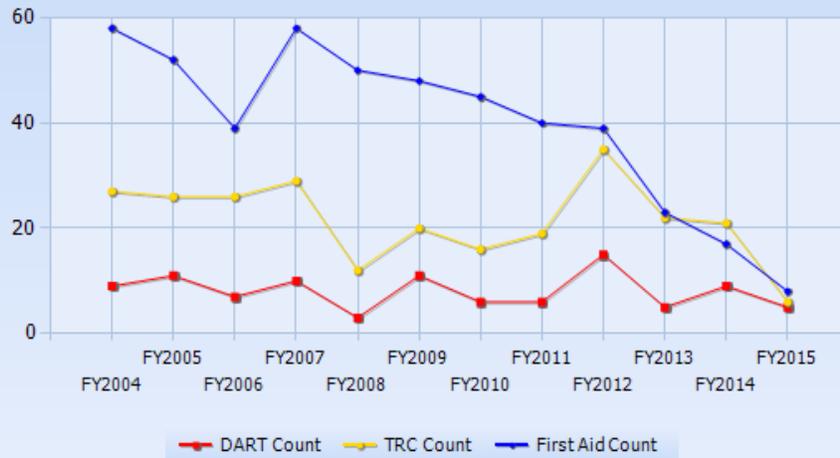

**Vehicle Accidents:**

None

**ORPS/Incidents/Notices of Violations:**

None
