**Medical Comments:** Employee was in the process of moving his personal belongings from work area to another when he picked up his tool box (30 lbs.) and felt pain in his left wrist. Approx. and hour later he noticed swelling and reported to medical. Given soft wrap and ice. He will be following up with his own orthopedic.

**ESH Comments:** The employee is in the process of moving his work location from PAB to the Village Weld Shop. He picked up his tool box, which weighs closer to 40 pounds, off of a table in PAB with his left hand and as he did so, he felt pain in his wrist. He immediately dropped the tool box. Another employee in the area loaded the tool box in the injured employee's car, and when he arrived at the Weld Shop, other employees unloaded the equipment for the injured employee. The employee then went to Medical. He was given first aid treatment and told to work within the limits of comfort and pain. The employee has an appointment with his personal orthopedic specialist on 11/12/15.

**Vehicle Accidents:**

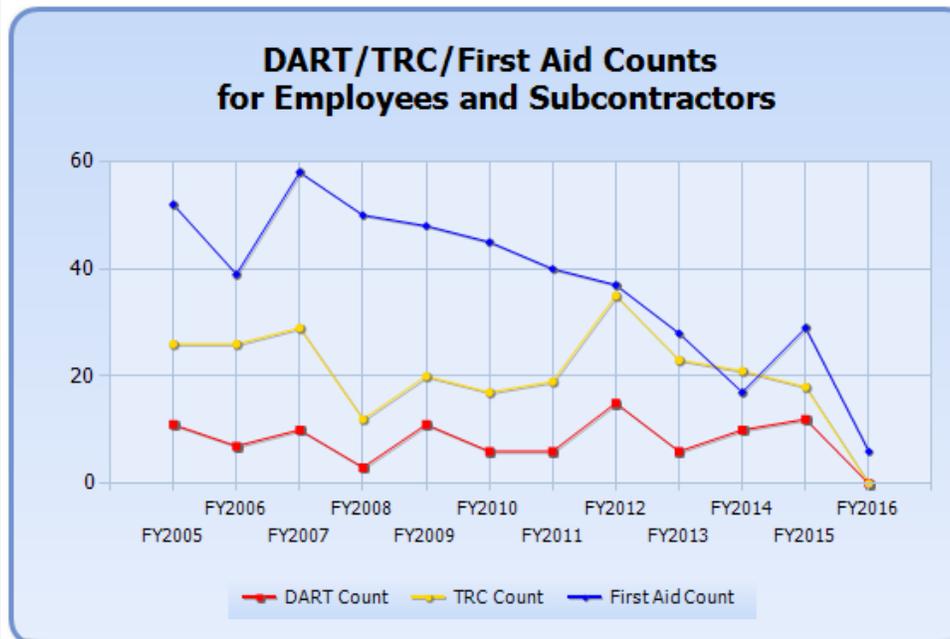

None

**ORPS/Incidents/Notices of Violations:**

ORPS 2E(3) – Significance Category 4, Any failure to follow a prescribed hazardout energy controll process (e.g. lockout/tagout, hazardous energy control program)  
 Contracted employee failure to follow lockout/tagout procedure.

During a construction site field visit, a subcontractor employee was observed performing an electrical Lockout (LOTO) application. The employee successfully locked out the equipment and proceeded to the verification phase, whereby observers noted that the employee was not fully following the appropriate safe work practices. Some examples included: lack of defined Arc Flash Boundary Limits, Incorrect Personal Protective Equipment (PPE) for switching the breaker, and a lack of positive verification that the voltage meter was in proper working condition. A decision was made that this incident would be categorized as an ORPS SC-4 “...failure to follow a prescribed hazardous energy control procedure”.
