Fermilab's S&H Program was praised last week by the auditors who were here to review our program against the criteria of the OHSAS 18001 international standard. Their week-long review was concluded with a recommendation for Fermilab's registration under the new 2007 standard. This is not only a major achievement, but a major milestone under the new contract that FRA holds with DOE. It was gratifying to hear the auditors say they were most impressed by the willingness of those they interviewed to engage in open, knowledgeable and frank discussions about worker safety. The "unrehearsed" nature of the responses to their questions convinced the auditors that we have a healthy safety culture that is committed to continuous improvement. We will soon have the distinction of being registered in both ISO 14001 and OHSAS 18001. ***Congratulations to all employees!***
