<p>Medical Comments: While reaching around I-beam to disconnect clamp, employee struck head, causing laceration.</p> <p>ESH Comments: The C-clamp attached to the I-beam is dark in color and not easily noticeable, and at head height for a taller person like the injured employee. The C-clamp was used as a hook for an air line hose. At other locations around the production floor where air line hoses are used, hooks made of flat iron have been fabricated and attached to the I-beams. The production supervisor has indicated that this C-clamp will be replaced by a similar hook. [RCR 5/30/08]</p>
