

Scheduling Meeting of 17 June 2008

Days worked since last recordable injury = 73

Fermilab Injuries and FY08 Goals

	FY2005	FY2006	FY2007	FY2008 to Date	Goal
TRC Cases	28	29	31	8	<10
DART Cases	11	7	12	2	<5

Reporting to Medical from 06/09/2008 to 06/16/2008

Division	Category	Case Date	Date Entered	Reportable	Rx	Medical		ESH		Case #
						ODD	LDD	ODD	LDD	
TD	FNAL	6/9/2008	6/9/2008	No		0	0	0	0	17286
<p>Medical Comments: Employee was tightening clamp on a CNC milling machine. Clamp slipped, then wrench slipped, causing right hand to hit other clamp; abrasion to right wrist resulted.</p>										
<p>ESH Comments: Employee was clamping down a plate using a clamp with steps (i.e. "teeth") and a step block (i.e. block with "teeth"). The steps on the clamp and the step block were barely engaged as he tightened the nut on the clamp with a crescent wrench in his right hand. The clamp shifted from the torquing action, causing the wrench to slip off of the nut, and the employee struck their right wrist on an adjacent clamp. A higher step block should have been used to provide full engagement. Also the crescent wrench was worn and loose. There would have been less chance for the wrench to slip if a crescent wrench in better condition would have been used, or better yet, a box end wrench. [RCR]</p>										
AD	FNAL	6/11/2008	6/11/2008	No		0	0	0	0	17306
<p>Medical Comments: STS (standard threshold shift) of 10.3 decibels was noted today for right ear of employee during confirming audiogram.</p>										
<p>ESH Comments: The employee works at the Central Helium Liquefier, which has several high noise areas, and wears hearing protection whenever he is in the high noise areas. The employee has significant non-occupational noise exposure. It was concluded that the unilateral hearing loss found during the audiogram was not the result of workplace noise exposure at Fermilab.</p>										
FE	FNAL	6/12/2008	6/12/2008	No		0	0	0	0	17326
<p>Medical Comments: Equipment bin lid slipped and struck employee's head, causing superficial laceration (1") of parietal area of head.</p>										
<p>ESH Comments:</p>										

Fermilab Leading/Lagging Indicators From 10/01/2007 To 06/16/2008

■ Outstanding
 ■ Excellent
 ■ Good
 ■ Marginal
 ■ Unsatisfactory
