

Scheduling Meeting of June 15th, 2010

Number and rate of TRC and DART cases by FY - Includes Employees & subcontractors

	FY06	Rate	FY07	Rate	FY08	Rate	FY09	Rate	FY10	Rate	Goal	Rate
TRC Cases	29	1.4	31	1.52	12	0.66	26	1.22	9	0.73	<12	0.65
DART Cases	7	0.3	12	0.6	3	0.16	12	0.64	0	0.00	<5	0.25

TRC = Total Recordable Case means more than first aid treatment was given.

DART = Days Away Restricted Transferred means more than first aid treatment was given AND restrictions were job limiting or the employee could not work.

Injuries/Vehicle Accidents:

Division	Category	Case Date	Date Entered	Recordable?	Rx	Medical		ESH	
						ODD	LDD	ODD	LDD
CD		06/02/2010	06/03/2010	No	Y	4	0	0	0

Medical Comments: While pushing a box with left arm and hand, subcontractor felt a painful twinge in left upper back.

ESH Comments: Subcontractor is a professional wrestler. He admitted that he had a match the week before his back injury and injured the area around his left rib cage. But he also stated that he was pain-free from it within a couple of days. This case was taken as an aggravation of a pre-existing condition. This case is not recordable for the laboratory because the contractor has <10 employees working on site.

APC	FNAL	06/10/2010	06/11/2010	Yes		0	17	0	0
-----	------	------------	------------	-----	--	---	----	---	---

Medical Comments: Employee was walking down stairs from cafeteria to auditorium lobby. Became distracted (adjusting name tag), then twisted right foot, and fell. Left ankle was sore by next day. Off-site (clinic) treatment included rigid splint for right ankle.

ESH Comments: The employee was heading back to the Main Control Room after attending a lecture in Wilson Hall when she fell down the stairs. The employee was not utilizing a handrail while she was descending the stairs. The rigid splint makes this case recordable, but the medical limitations do not affect the employee's ability to perform her work, so the case is not DART.

BS	FNAL	06/13/2010	06/14/2010	No		0	0	0	0
----	------	------------	------------	----	--	---	---	---	---

Medical Comments: Firefighter was unhooking a trailer, while wearing gloves. Handle of the jack pinched left small (fifth) finger (through the glove), causing avulsion.

ESH Comments:

ORPS/Incidents/Notices of Violations:

None reported
