**Medical Comments:** The employee was working on a dropped ceiling removing tiles when dust fell onto face and into his left eye. Patient thought it would work itself out but ended up going to Tyler Medical on 12/28/11. Rx given.

**ESH Comments:** On 12/27/2011, at approx. 3:00 p.m., the employee was removing overhead ceiling tiles and a particle entered his left eye. The employee did not believe the particle to be of much significance, so he did not report the incident, nor try to remove the particle. During the evening he noticed his eye was tearing and becoming more painful. The following morning he reported the incident and was sent off-site for medical evaluation which resulted in Rx eye drops. The employee was wearing safety eye glasses that are typical for this work and the eyewear was worn throughout the work activity with periodic removal to clean the lenses. The amount of dust/particle debris that was on the ceiling tiles was such that a tight pair of goggles would have provided additional protection. The employee underestimated the severity of injury that could result from not seeking prompt medical evaluation/treatment. The incident resulted in medical treatment (Rx); the incident did not result in days away and there was no restricted activity.

### Vehicle Accidents:
