7 presentation tools and automatic documentation generation

- ROOT has a simple and flexible graphics editor, which solves most of the transparency-making problems
- ROOT plots could be saved in
  - .ps, .eps, .gif formats
  - as a source file (ROOT macro)
  - hstograms could be saved into ROOT file (UNIX-like directory structure)
- **THtml** class provides tools for automatic generation of the documentation (see **http://root.cern.ch** for ROOT classes reference manual)
