### Science News in the 21st Century

**Charles Day**

Physics Today

**May 23, 2016**

1:00 p.m. - Ramsey Auditorium

Science news is in a paradoxical state. On the one hand, newspapers and TV stations continue to shrink and cut their science coverage. On the other hand, more news about science is available than ever before, notably online. But the key question remains: how to identify and satisfy the public's interest in science?
