

# "The 2015 Neutrino Nobel Prize — a theoretical perspective"

**Stephen Parke**

Fermilab

**December 9, 2015**

4:00 p.m. - Wilson Hall, One West

This week Prof. Takaaki Kajita of the SuperKamiokaNDE collaboration and Prof. Art McDonald of the SNO collaboration will receive the 2015 Nobel Prize in physics. The citation reads “for the discovery of neutrino oscillations, which shows that neutrinos have mass.” In this colloquium, I will discuss the physics associated with this award from a theoretical perspective.
